

Environmental policy

We comply with laws and agreements

Compliance with applicable laws, regulations and mutual agreements is a fundamental precondition in our work and our perception of the environment.

We are aware of our influence on the environment, and we work to protect it and prevent pollution.

We show environmental considerations

We are committed to minimising environmental impacts through planning, design and choice of method. We want to measure significant environmental parameters and report on current improvements. We will seek to minimise waste and excessive consumption during our handling and consumption of materials.

We will take the environment and fuel efficiency into consideration when we purchase, operate and maintain our machinery. We will pay attention to correct handling of waste and to possible recycling.

We all hold responsibility for the environment

We expect that all our employees are aware of environmental issues with priority to protecting the environment on a short-term and long-term basis.
